52-Week Money Challenge Tracker

Save $1,378 in a year — one small week at a time

Check off a box each week. Weeks can be done in any order — the total is what matters.

How to run the challenge

The rules

1. Each week, move that week's dollar amount into a separate savings account.

2. Check the box. Weeks may be completed in any order.

3. If you miss a week, do not restart — just take the smallest remaining week.

Four difficulty tiers

Classic: as printed — $1,378 for the year.

Boosted: double every amount — $2,756.

Aggressive: multiply by five — $6,890.

Reverse: start at week 52 in January and work down, so the hardest weeks land first.

Where to keep the money

An online high-yield savings account, separate from checking, with no debit card attached. The transfer friction is the feature, not the flaw.

At the end of the year

Fund one month of an emergency fund, pay off your highest-interest balance, or roll it forward as next year's starting balance. Don't leave it in checking.
